April 23, 1935.

NARCISSUS INSPECTION RECORDS FOR 1934

The attached table gives a record of the narcissus plantings inspected during the calendar year 1934 under the Federal quarantine for the prevention of spread of bulb pests. The figures given are summarized from the reports sent to this Bureau by the nursery inspectors of the various States who act as Federal collaborators in making such inspections.

Similar tables have been issued in previous years, that for 1933 being given on pages 12 to 14 of No. 118 of the Service and Regulatory Announcements of the Bureau of Plant Quarantine.

LEE A. STRONG

Chief, Bureau of
Entomology and Plant Quarantine.

¹In some cases the treatment shown was precautionary, and it therefore does not necessarily represent infestation in the stock concerned. This is especially true in the case of fumigation in New York, Oregon, and Washington, where that measure constitutes routine practice. Most or all of the bulbs shown under the column headed "bulbs certified as uninfested," in those States were eligible for such certification but were planted back by the grower; while all the bulbs sold and shipped were fumigated whether bulb flies were found or not.
